Here's the Greatest of All
American Romance-Spectacles

"The Pony Express"

The Pony Express rides the trail of thrills again. Pony hoofs thunder across the continent from Missouri to California, and East and West are linked again as they were in 1860.

Across 2,600 miles of unblazed tract. Through scorching sun and black of night. Through ice and snow and raiding Indians. Eight days and nights of perilous riding and unmatched heroism.

From this thrilling page of history, the screen's greatest director of epic romances has wrought his successor to "The Covered Wagon."

Not for a day, not for a year—like "The Covered Wagon" it will live in the heart of America forever!

Old-Timer Passes In Angus McLean

Died—At nine o'clock on Friday morning, September 3rd, Angus McLean, aged 47 years.

The deceased was born in Ontario, moving from there to Duluth, Minn., where he remained until 1905, when he came to this district with the earliest settlers, locating south-west of Champion, where he resided at the time of his death. He had been in poor health for the past six years but his death was unexpected, heart failure being the cause. He was widely known in this vicinity and was for some time a councillor of the Municipal District of Harmony. He leaves to mourn his loss his wife and six children, four boys and two girls, the eldest being fifteen years old.

The funeral took place on Sunday to the Champion cemetery, service being held in the United church at 3.30. Rev. S. R. Hunt being in charge. The pallbearers were A. Hopkins, John Miller, P. P. Petersen, L. Fath, P. Holmes and H. Williams, all old friends and neighbors of the deceased.

Mrs. McLean and family have the sympathy of the community in their bereavement.

Just before the recent rains Howard Smith, with a road maintainer, and George Dupue, with a road drag, put the village streets in the best shape they have been in this summer. The change was so satisfactory to everyone concerned that it is to be hoped some consistent effort to prevent a return to the rocky stuff, not up with most of the summer, will be made. Surely we can afford to keep the main street, at least, fit for ordinary traffic.

While you might not expect it, in his leisure moments W. C. Hoskins is considerable of a horticulturist, and at present he has the finest hollyhocks in the country. Sweet peas and other flowers are raised in profusion, but don't miss seeing those hollyhocks if you live near Champion. Solomon in all his glory was not arrayed as one of these.

Flower Sunday at United Church

The Ladies' Aid of the United Church are endeavoring to make Sunday, Sept. 12, a red letter Sunday in the history of the church by instituting a "Flower Sunday." It is hoped that anyone having flowers will send them into the church on Saturday afternoon, or to any of the committee in charge. Special numbers will be given by the choir, and a short programme by some of the younger members of the congregation. Come out Sunday evening at 7.30 and make the service a success.

First Loads Wheat From Dow Farm

The first two loads of this year's grain to reach Champion elevators were from the farm of Guy Dow and were delivered to Fred Clever at the Home Grain elevator on Monday, Aug. 30. The sample was fair and the grain in good condition. Unfortunately, rain prevented the grain movement from spreading.

E. J. Garland addressed a meeting in Campbell's hall on Tuesday evening, Aug. 31st. The rainy weather and bad roads prevented the attendance expected, but those on hand were treated to a splendid resume of the ex-member's actions during the recent session of parliament. Mr. Garland is certainly not deficient in platform ability.

The Jopling outfit entertained a number of their friends to a corn feed in the cook car on Friday evening last, and a delightful time was spent, the guests, one and all, expressing their appreciation of the excellent cooking as well as the after entertainment. Loryn Church and Lyman Jopling were in charge of the culinary department and also led in entertaining the visitors during the evening.

NOTES AND COMMENT.

And now the United States weather bureau says the moon has nothing to do with the weather. There was a time in most of our lives when the moon was credited with influencing almost everything. Potatoes, corn and other seeds would rot in the ground if not planted in the proper phase of the moon. Pork or beef slaughtered in the wane of the moon was never satisfactory, and the same idea applied to numberless things. Gradually these superstitions have succumbed to repeated experiences that they were wrong, but the weather activities of the moon are believed in largely to the present day. The wet and dry moons pointed out so confidently really have no significance, if the experts are to be believed, and the man who assures you the change of the moon will see a change of weather is simply talking nonsense. The full moon is often credited with being the danger period for frost, but during the last forty-five years frost has occurred in every phase of the moon. Poor old moon!

It is very natural that any new political organization should assume itself better than anything in existence at the time it originated, but to assert that it is entitled to the distinction of not being called a "party" is rather beyond the understanding of the average individual. The Labor representatives do not seem to object to the term, few as their numbers may be, but when allied with the farmers they become part of a "group," but are not members of a "party." There may be some wonderful significance to someone in this play with words. Let us hope there is.

It would be well for those who go to vote on September 14 to remember that this is a Dominion election and that the "X" is used instead of figures. Only one candidate may be voted for in this instance.

Preliminary Estimate
Alberta's Crop Acreage

The acreages in the various crops this year, as arrived at between the Dominion and provincial departments, are as follows:

Wheat..... 6,370,193 acres.
Oats for grain..... 2,478,404 acres.
Oats for feed..... 1,330,560 acres.
Barley..... 518,000 acres.
Rye..... 130,900 acres.
Flax..... 5,000 acres.

The figures quoted are preliminary estimates, and are subject to revision when the census figures, taken in June, become available.

Alberta Tax Commission.

Sittings of the Alberta Tax Commission, under the chairmanship of Dr. H. M. Tory, will be held in the south of the province, commencing Wednesday, Sept. 15th.

These sittings will be held in the council chamber of the city of Calgary on Sept. 15th and 16th; at Lethbridge the 16th and at Medicine Hat the 17th

NEWS NOTES

A yield of 20 bushels an acre of winter wheat was obtained on the farm of L. Atkinson, near Ravens, during the past week.

The wheat pod in Alberta now has under contract three and one-half million acres of wheat, or more than half the total acreage in that crop.

A party of British manufacturers visited the province during the past week, paying short visits to Edmonton, Calgary and the Prince of Wales' ranch.

Sir Oliver Lodge recently declared that before the society met again scientists would have acquired actual knowledge of what becomes of man after death.

A representative of a large grain exporting house after a survey covering the province estimates that this year's wheat crop will run about 100,000,000 bushels.

Mr. C. S. Washburne, salesman for the Lacombe nurseries, is in the district and reports orders for fall and spring delivery of trees being taken at a brisk rate of speed and is pleased to be able to report good progress in the growing trees despite the windy summer.

The automobile and good highways are familiarizing people with the geography of our own country and the United States as nothing else has done. This we see testify from all over the continent passing through or spending the night at our auto camp and incidentally they all spend a little money in the town.

Queen Marie of Rumania, will visit Canada this year. She is one of the world's most famous women.

WORST FIRE IN HISTORY

Here are some facts about one of the greatest forest fires in the history of Alberta and it is the first we have heard about it:

Location—North and west of the Athabasca river, to and probably beyond the B. C. boundary. Duration—Raging with varying intensity for the past two months, and not yet extinguished. Area—Four distinct fires, covering altogether a strip of country some fifty miles wide and from fifty to one hundred miles deep. Extent of damage—Probably 200 square miles of country burned over, with a possible loss of 200,000,000 board feet of timber. In the almost inaccessible

Today, there are 60 men still on patrol along the edges of these conflagrations, and while it is believed that immediate danger is now passed, continued dry weather this fall will mean a further spread of the flames.

J. M. Moffatt and L. F. Thompson attended the funeral of the late William Moffatt at Claresholm on Wednesday. The deceased was in his 70th year and had lived at Claresholm since 1902. He was J. M. Moffatt's uncle and Louis Thompson's grandfather.

After eight days of wet weather the sun is again shining and hopes are now entertained that the deluge is over and that threshing operations will be possible early next week. The grain in stock has suffered considerably both by sprouting and bleaching, the real extent of which will only be discovered when the grain is threshed. On Wednesday night there was a white frost which evidently was general over the district. Its effect on standing grain is also problematical. Many men have left during the rains but others will likely put in an appearance before threshing starts.
